

ACT BTC Ch Show - 4th October 2009

I was honoured to be invited to judge the Australian Capital Territory BTC Ch show, and though hearing from others who had judged Australian Bull Terriers was uncertain as to what I would find. Any doubts I had were soon put to rest as soon as the dogs entered the ring, I could well have been in England, the committee had even organised English weather to make me feel at home! The overall quality of the exhibits was excellent, my top winners could win anywhere and would certainly not be out of place on the green carpet at Crufts. In common with the dogs back home there is a tendency I feel to longer backs, I know when I look at photos of our dogs 30yrs ago the shortness of backs is quite striking. The long backs do not always mean upright shoulders, but in most breeds a pleasing layback of shoulder is increasingly hard to find. In the matter of mouths I do expect a correct mouth, a misplaced tooth as long as it is merely an inverted incisor with the jaw correctly aligned I can forgive, but inclining lower canines with the points closing inside and up into the roof of the mouth are a different matter. It is appearing more across all breeds, with various theories about narrowing lower jaws but it has been present in bullies to my knowledge for over 25yrs. Most exhibits were well presented with the majority in show condition, though some would have benefited from a little more ringcraft, just like England!

It is always promising for a breed to find great depth of quality in bitches, if the young ladies I saw today have a say in the matter the breed has a rosy future. I found it interesting to read the catalogue on the long flight home and see the relationship of the winners, in dogs my top winners were out of the same bitch who seemingly lays golden eggs. My top bitches were litter sisters, and several winning bitches also, which substantiates the quality of the breeding programmes and the consistency of that quality.

BULL TERRIERS

Class 2 Minor Puppy Dog (4)

Humphrey's Bullroy Trigger Hammer, top quality compact cobby white dog. Super head, well filled, sound construction. Immaculate condition, moved freely and showed non-stop. His mismark could not detract from his many virtues. Res CC

Villano's Evildouer Kung Fu Panda another quality white pup. Good head, sound construction, rather unsure of himself today, merely needs time to settle.

Stephenson's Satori Hot Hot Hot smart young red dog with good sweep to head. Rather upright in shoulder and his high tail carriage spoils the picture on the move.

Class 3 Puppy Dog (6)

Wright's Lowdina Perkin Warbeck quality white dog with good head, well filled. Nothing exaggerated just sound construction also reflected in his movement.

Stephenson's Satori Champagne Buck lovely headed dog with 'Archangel' ears. His front is good yet his shoulders are rather upright. Hind movement needs to improve.

Stephenson's Ch Satori Karnakarrhu large tri-coloured quality dog with good well filled head. Good front. Moved and showed well.

Bush's Ch Kubhaven Bullwinkle White heavyweight dog of sound construction. Rather coarse in head not helped by poor ear set and disinterest standing.

3. Burgoine's Bodalla Marshall Stone white with lovely profiled head that when viewed from the front did not fulfil the promise of that profile. Mouth did not please. Showed well and well handled.

Class 7 Open Dog (2)

Sarenji Kennel's Sarenji Easy Rider red brindle and white dog shown in good condition apart from his teeth. His overall picture of good construction was marred by his high tail carriage on the move.

Hoare's Alunday Dynamite heavyweight red dog good head but incorrect mouth, upright shoulders which did little to shorten him. Did not drive through on move and carried his tail like a foxhound.
