#### **PUPPY DOG**

##### **1. Shaunuff Livin La Vida Loco (1)**

10 month old Fawn dog. This young male is of nice type, size, and has a pleasing head and expression, however the muzzle could be better set back. Correct bat ears, which were placed. Lovely moderate, round eye of good dark colour. The front was slightly 'east west' and quite narrow. On the move he tended to paddle in the front. As he is still quite young, and lacks any depth or width of chest due to immaturity, this front will hopefully improve as his chest drops and his front widens. Good neck flowing into a good, strong topline and gently roached back. I would prefer a better turn of stifle through the hindquarters. Good tail which was thick at the root. Promising young dog, and very much a 'showman'.

## **JUNIOR DOG**

2. Ch Jonhah I'm Just A Hobo - Absent

## **INTERMEDIATE DOG**

3. Ch Tzustruck Bendit Like Bender (3)

2 year old brindle dog of nice size. He has a well set muzzle. The lips were a bit too pendulous, however he had a very pleasing head overall and beautiful expression. Good round and dark eye. Correct bat ears which were correctly placed. His front was quite straight. I would have liked a better length of neck. His shortness of neck really threw out the dogs balance and outline. Quite down on pastern. The dog was too wide through the front and he lacked depth of chest. Whilst his topline was strong, I would have liked a better roach, as the topline almost appears flat. Quite long in hock, which presents through rear movement and he was quite weak. Lack of second thigh through the hindquarters. Lack of tail which did not cover the anus. Lovely coat of excellent texture and colour, and in good condition.

4. Opalguard Sexyback (2)

Fawn dog of 18 months of age. The head was quite large, and slightly out of proportion to body. He lacked condition on the day, however this could be immaturity. Pleasing eye and expression, good wide nostril and correct bat ear. The shoulders were quite straight, and he could do with more upper arm to give better balance. The topline was flat and presented no gentle roach. He was slightly long through the body. Nice short hocks and a good turn of stifle through the hindquarters. Whilst there is some tail, I would prefer more length. Good moving dog, very true coming and going. The coat was of good texture, however it was quite smutty and not a clear fawn.

5. Llachar Osprey Avenger (1)

Brindle dog of 18 months of age. Very promising young dog. Pleasing head and expression. Well set back muzzle. Correct bat ears and well set. Nice wide skull, flat between ears, and correct domed forehead. His eyes were slightly small in proportion to skull and could be rounder, as they were almost bordering on almond shape. Good bone and condition. Excellent, thick neck of moderate length. Strong topline with correct gentle roach. I would like a better turn of stifle through the hindquarters, however he has lovely short, well let down hocks. Lacked tail. Excellent mover, very true coming and going. Overall he is very nice young dog.

## STATE BRED DOG

### 6. Ch Llachar Nocturnal Marauder (1)

Brindle dog of almost 2 years of age. Very nice type, however could use better cut up under the loin. Very pleasing head with typical 'Frenchie' expression. His lips were a little too pendulous. Beautiful dark round eye, well set into head. Correct bat ears and well placed on skull. Correct black nose, however a wider nostril is desired. Good front, with excellent lay of shoulder. Correct cobby and muscular body. Strong topline with correct roach. Good hindquarters. He is also a little short through the loin which throws the topline when he is moving. Moving away, he is quite wide. The tails coverage is slightly short of the anus. Correct coat of excellent colour and texture. Overall, a very nice brindle dog.  
RDCC

### 7. Ch Swifdelight US Forces (2)

Brindle male of 19 months of age. Well marked brindle in good condition. Head quite pleasing. Muzzle well set and good depth of lip. Good shape of eye, well sized and placed, correct dark colour. The ears could be firmer and better used, slightly large in proportion to the skull. Correct black nose, however a wider nostril is desired. The front was quite straight through the shoulder and the dog lacks chest, which shows in his movement, as he tended to paddle. Good topline. Quite long through the hock. Overall the dog could use more muscle condition. Given he is only 19 months of age this may come with more maturity. Overall quite a nice type.

## AUSTRALIAN BRED DOG

8. Llachar Master of Disguise - Absent

9. Ch Emorette Barnes Storming (1)

Black and White pied male of 3 and a half years of age. This boy has a very pleasing head and expression, and is the best seen so far. Correct square head which is in proportion to the dogs size. Well set back muzzle, cheeks well developed. Correctly set ears, well proportioned and correct shape. Correct dark, round eye which is well set. Cobby and muscular body. Deep, wide brisket and ribs are well sprung. His lay of shoulder is quite straight, which makes him look very stuffy. The neck could have been of better length, as it is quite short. Slightly down in pastern, which also presented through this movement. The topline is nearly level and presented no roach. Lack of tail (did not cover the anus). Overall this dog is in excellent condition, has beautiful muscle tone and condition throughout. He was well presented and well shown.

## **OPEN DOG**

### **10. Ch/Am Ch Fabelhaft Robobull Smokin' Hot (2)**

Dark brindle male of 5 years of age. Overall I would like more masculinity, however he is a well put together dog. Pleasing expression and head, however quite pendulous through the lip. Correct bat ears, however they are set a little close at the top of the skull. Lovely dark eye, but would prefer a slightly larger eye in proportion to the head. Well set front and strong, correct toppling. His neck is a little short in length. Cobby, muscular body. Lovely muscular hindquarters with correct angulation. The dog has no tail at all. A good showman, and very correct mover.

### **11. Ch Shaunuff Banjo Player (1)**

Fawn dog of 2 years of age. He is in excellent condition and possesses good breed type. The head is almost rectangular as opposed to square in shape. The muzzle could be better set back, and cheeks more developed. Correct bat ear of good size and placement. Nicely set eyes of correct shape and colour. Excellent front – well up on feet, good bone and correct lay of shoulder. Compact and muscular body without any exaggeration. Strong and gently roached back, which held on the move. Excellent depth of chest and width through the front. Strong, well muscled hindquarters with moderate angulation. Excellent length of tail. A true showman who moves beautifully and correctly. The coat is of excellent texture, however a little smutty. Overall, he is an excellent example of the breed. DCC / RuBISS

# **French Bulldog Club of Queensland – Open Show 2016**

## **BABY PUPPY BITCH**

### 12. Mityangu Diva Devine (1)

Five month old brindle bitch. Good size for her age and in lovely condition. Muzzle a bit long and could be better set back. Cheek muscles not quite developed, but this will hopefully develop with maturity. Correctly shaped ears and well positioned on skull. Well set shoulders, and good bone. Slightly down in pastern but that may correct as she matures. Excellent length of neck. She is already presenting a very good cut up and topline. She is a little long through the loin. Her hocks are also quite long. Overall quite a promising young bitch

## **MINOR PUPPY BITCH**

### **13. Shawthing Rock N Candy (2)**

Fawn pied bitch of 6 months of age. Her muzzle could be better set. At the moment she is quite down faced and almost presents like a duck face. She has a lovely dark, round eye, which is well set. The ears are of good size and in proportion to the head. Pleasing front with well placed shoulders. Quite long through the loin, could use a better upper arm as it throws the balance of the dog out. Strong topline with correct gentle roach. Good tail. Excellent hindquarters with correct angulation. This girl is very showy and moves very well coming and going.

### **14. Shawthing Hush Puppy (1)**

Fawn bitch of 8 months of age. The head is quite small in proportion to body. The muzzle should be better set back. I would have liked more fill through the cheek for her age. Lovely dark eyes of correct shape and size. Her ears are a little large in proportion to the skull. Very good front with excellent bone and well laid shoulders. I would have liked a shorter neck on this girl. She has a strong topline with correct roach. Correct coat texture, however the colour is quite smutty. She has an excellent tail, and is in excellent condition. Very showy young lady.

### **15. Avenir Petti Fleur (3)**

Brindle bitch of seven months of age. Pleasing head and expression. Ears could be slightly wider set on the top of the skull. Correct dark, round eyes, which were well set. Well laid shoulders and overall excellent front. Could use a slightly longer neck. Her topline was straight and she was too short in body, which really took away the whole balance and outline. Good hindquarters. She was in excellent condition and had a coat of excellent texture and colour. Unfortunately does not present any tail. Good mover coming and going.

## **PUPPY BITCH**

### **16. Tawhiao Cleopatra Electra (3)**

Lightly coloured fawn of 9 months of age. The ears are very large in proportion to the head, which detracts from the overall expression. Good front and bone. Well laid shoulders. The rear is very close when moving away. Good tail.

### **17. Llachar Romance in Verona (1)**

Brindle bitch of eleven months of age. Very pleasing head and expression. Well set back muzzle. I would have liked a little more width through the skull. Beautiful dark eye, round in shape. Lovely bone in proportion to the body. Cobby, muscular body and in excellent condition. Strong topline with correct gentle roach. Excellent hindquarters. Very showy bitch that moves correctly. Overall a very promising young bitch.

### **18. Avenir Tall Poppy (2)**

Brindle bitch of seven months of age. Good round eye of correct dark colour. Correct bat ears which were well set and of good size. Pleasing head and expression, however the upper lip did not meet the lower lip, and whilst the bitch was stationary, teeth could be seen which is not desirable. This could be due to teething or maturity as she is only 7 months. She could use more fill through the head, but again this will hopefully come with maturity. Lovely cobby cobby, and well muscled throughout. Nice cut up. Whilst the topline was strong, it lacked any gentle roach. The bitch unfortunately had no tail. Overall in very good condition and a lovely moving bitch.

## **JUNIOR BITCH**

### 19. Keeswey Elegant Queen at Protectabull (3)

Brindle bitch, 1 year old. Pleasing head and expression, however a little masculine. Well placed ears of good size and shape. Lovely bone and condition. Well laid shoulders, but unfortunately was limping on the front show side, so did not move true on the day. She is very long through the loin, which detract from the overall balance desired. Good tail and excellent hindquarters. Overall quite masculine for a bitch, and big for her age.

### 20. Meralla Gypsy Rover - Absent

### 21. Opalguard Boom Shake the Room (2)

Brindle bitch, 1 year old. Her head could use more fill throughout, which may develop as she continues to mature. The muzzle is slightly downfaced and could be better set back. Ears are of good shape and size, and well placed on the skull. Lovely round eye, well set and dark in colour. Good length of neck. Shoulders are a bit too wide set. When she moves, she is elbowing out in the front, however has beautiful rear movement. Strong topline however it lacks the typical roach. Unfortunately there was no tail. Lovely condition and excellent coat.

### 22. Abiaan Primadonna Girl (1)

Brindle bitch of 11 months of age. I was drawn to her exceptional type as soon as she hit the ring. Beautiful head and expression with well set ears. Lips a little pendulous, but not excessive. Good dark eye, lovely and round. Nice open nostrils. Front set wide apart with correct straight bone. Slight down on pastern. Excellent topline, correctly proportioned roach over back. Excellent hindquarters and well let down hocks. The bitch was in lovely condition, and well muscled throughout. Very true mover. Very clean coming and going. A very showy bitch that owned the ring. A stand out in this class. BCC / BISS

## **INTERMEDIATE BITCH**

### **23. Ch Shaunuff Lady Madonna (1)**

Fawn bitch of 19 months of age. Lovely clear coat with black mask. Very pleasing head and in excellent condition. I would have liked more fill through the cheek, but overall her head is in proportion to the body. Correct round, dark eye, which was well set. The lay of shoulders was a little straight. The topline was straight and no there was unfortunately no roach. Beautiful cobby and muscular body. Excellent turn of stifle and short hocks. She has a short tail. Overall, a lovely young bitch in exceptional condition.

### **24. Mydenka Crème de la Crème (2)**

Brindle bitch, almost 2 years old. Reasonably pleasing head with good round eye, dark in colour. Muzzle could be better set back and lips could be a bit tighter. Slightly long through the loin, but bitch presents correct roach over the topline. Good bone, and well muscled body. Good tail. Good hindquarters, however a better angulation in the stifle would be desired. Very clean moving bitch. Very true coming and going. A little masculine and overdone, but overall of good bitch.

### **25. Swifdelight Your Ex is on Fire - Absent**

## **STATE BRED BITCH**

### 26. Ch Llachar Lover of the Light (2)

Brindle bitch of 2 and a half years of age. Pleasing head, with a lovely round eye and a well set muzzle. The temperament was a little soft and she didn't use her ears particularly well. Quite straight through the front, also very broad through shoulders. She was a little light on, but she had recently had a litter. Excellent coat texture and colour. Unfortunately she had not tail.

### 27. Swifdelight Elvira (1)

Brindle bitch of six months of age. My first thought was this bitch was far too small, however with her age being only six months, this explained the size. Lovely head and expression, very pleasing. Well set ears, well positioned. Overall condition is very good. She has a well balanced front, well laid shoulders, neck is well proportioned. Lovely short hocks and an exceptional moving bitch, very free. She has a good tail. Strong topline, however the topline is straight and no roach is present. Correct clown like temperament.

## AUSTRALIAN BRED BITCH

### 28. Ch Kiangsi Showem Special Edition (3)

Brindle bitch of nearly three years of age. The bitch is masculine and lacks femininity. Pleasing head with well set muzzle and lovely expression. Nostril's wide open. Correct dark, round eye. Correct bat ears which are well set. She has a well proportioned neck, and good wide front. The shoulders are quite wide set. Her body is quite long and the top line raises as opposed to having the appropriate roach. Excellent hindquarter, however could use more angulation through the stifle. Excellent tail and coverage. Good coat texture and colour. Overall this bitch is in good condition, but too long, and too masculine without typical roach.

### 29. Ch Jonhah Tilly Devine - Absent

### 30. Ch Llachar Papillon Si Joli (1)

Brindle bitch, 20 months of age. Very typey, with excellent proportions throughout. Very pleasing head and expression. Lips a little pendulous, but not excessive. The ears are a touch large in proportion to the bitch's head, however they are correct shape and well set. Lovely dark eye, and correct round shape. Nice front with a correct lay of shoulder. Strong topline and gently roached back. Excellent hindquarters, however lacking some muscle tone. Very true moving bitch. Overall this was a lovely bitch, however she was a little overweight and lacked muscle condition.

### 31. Ch Swifdelight Play Me a Symphonie (2)

Pied bitch of about two years of age. Has an excellent temperament, however far too short through the body. Her expression is good, however the eyes are slightly wider apart and the muzzle could be better set. Well set ears of correct size and shape. Well laid shoulders, and nice wide front. The neck is quite thick, however I would have preferred a touch more length. She moved quite wide when walking away. Her hindquarters were strong and well muscled, however the stifle could have better angulation. The shortness of body detracts greatly from the overall balance and outline of this bitch.

## **OPEN BITCH**

### **32. Ch Emorette Eadee Ma Mere (1)**

Brindle bitch of nearly 3 years of age. Very pleasing head and expression with lovely broad muzzle. Good wide nostril. Correct bat ears of good size and well place on the skull. Well set dark, round eyes. Excellent front and correct lay of shoulder. Good topline, with lovely gentle roach. Excellent proportions with length of body. Good muscle condition, however she was a little fat on the day. Excellent hindquarters, however I would have liked more angulation on the stifles. Lovely short hocks. Unfortunately no tail. Overall she is a lovely type and of excellent condition (despite a bit of excess weight).

### **33. Ch Swifdelight French Du Jour (2)**

Brindle bitch of approximately 3 and a half years of age. Very typey bitch with pleasing head. Her muzzle could be slightly better set back. The eyes are slightly almond shaped as opposed to round, which does detract from the expression. Ears are of good shape and proportion to the skull. Nice wide front. Lay of shoulder is a little straight, but only slightly. Unfortunately topline lacks typical roach. Very true mover coming and going. Good sized bitch and lovely proportions throughout. Overall a very nice bitch.
