1	No	3/24/2016 3:14 AM
2	N/A	3/24/2016 2:34 AM
3	The one had hip problems	3/24/2016 2:16 AM
4	bulbusprolaps	3/24/2016 1:49 AM
5	Significant skin issues undiagnosed after 4 vets and multiple types of treatment for "allergies" "bacterial infection" "fungal infection"	3/24/2016 12:46 AM
6	no we have been very lucky with our breeding we have always health checked before any breeding with sire /dam and have as many health tests we can. Even if we purchase a puppy, we eye test, thyroid screen testing for heart and liver, Patella Luxation Hip Displasyia ,SM/CM. Also have a full MRI scan on the full dog before we decide to breed.	3/23/2016 10:54 PM
7	No	3/23/2016 9:50 PM
8	Diabetes	3/23/2016 8:40 PM
9	both my griffons get a cough - I cover their nose with my thumb and they take a big breath and it stops. I don't know what this is called	3/23/2016 7:45 PM
10	She sometimes has snoring, noisy breathing and looks afraid, It comes mayby ones a month.	3/23/2016 7:30 PM
11	No	3/23/2016 7:26 PM
12	My griffons eye popped out, managed to save it but after 3 years it started to enlarge and was painful so had it removed.	3/23/2016 5:26 PM
13	At 8 yrs old developed high liver enzymes.	3/15/2016 1:49 PM
14	I have a very healthy 5 year old who rules our house, he has never had to attend the vet for any illness.	3/15/2016 11:45 AM
15	Itching of feet without a diagnosis. I have had her to the wet but we can not find anything, she just itches. Especially after walking outside. I have to clean her feet after every walk and we use socks on her.	3/15/2016 8:33 AM
16	Umbilical hernia - 3	3/15/2016 5:16 AM
17	Cateracts 2 years old,patella 1 years old	3/15/2016 3:21 AM
18	No	3/15/2016 2:10 AM
19	Allergy	3/15/2016 12:15 AM
20	No	3/14/2016 9:50 PM

43	No	2/29/2016 2:38 PM
44	No	2/29/2016 2:09 PM
45	Brittle teeth-1. I've had dogs all my life & never one whose teeth break like my griff's do.	2/29/2016 1:56 PM
46	no	2/29/2016 1:41 PM
47	One griffon has had a vulva operation but still continues to have issues in that area	2/29/2016 1:23 PM
48	NA	2/29/2016 1:19 PM
49	None to report	2/29/2016 1:14 PM
50	Both get very itchy dermatitis	2/29/2016 1:13 PM
51	Canine eye Proptosis	2/29/2016 1:09 PM
52	Collapsed lung	2/29/2016 9:30 AM
53	In one litter we lost all 4 puppies due to very heavy delivery and perinatal complications (there vere no palate clefts).	2/29/2016 1:35 AM
54	No	2/28/2016 11:17 PM
55	No	2/28/2016 9:04 PM
56	Liver shunt Scoliosis Idiopathic skeletal hyperostosis	2/28/2016 10:40 AM
57	Mitral value disease	2/28/2016 4:51 AM
58	In the 80's we had 2 diagnosed with dementia and a lot of pups faded and died at 48 hours	2/28/2016 1:10 AM
59	O	2/28/2016 12:28 AM
60	Had one puppy born with no tail and no anus. She was euthanized the next day. The 3 cryptorchid puppies were each neutered before they reached 12 months. I did purchase a female with luxating patellas but once my vet discovered them, I had her spayed and rehomed her, so she was never a part of my breeding program.	2/27/2016 11:45 PM
61	The puppy I bought was purchased from a reputable breeder a part of a breeding programme, both parents tested & MRI clear	2/27/2016 10:50 PM
62	He had an undescended testicle but was neutered at 7 months.	2/27/2016 10:06 PM
63	None	2/27/2016 9:03 PM
64	Ear cancer, tooth problems	2/27/2016 8:01 PM

65	The cataracts were diagnosed as "old-age" cataracts by eye specialist. The anasarca and pectus excavatum were in different breeding line to the usual lines I tend to stay with. One luxating patella again came from a different line and the other was created by the griffon jumping or bouncing on his hind legs. I have had two griffons MRI'd for SM/CM and two have had their skulls radiographed. The MRI's were clear, and the skulls were within normal limits. On the whole I have been fortunate and have relatively healthy, mentally and physically griffons. I have endeavoured to stay within or close to my own breeding lines, the three times I have bred outside is when I have experienced some of the health problems mentioned above.	2/27/2016 7:52 PM
66	In general I've found the breed to be healthy and well with little or no visits to the vets	2/27/2016 7:46 PM
67	NO !!!	2/27/2016 6:46 PM
68	My Jessie had pancreatitis as an older dog, but I'm not sure if it was the result of her eating a dead rat that had residues of poison in it. She was about 5 10 yrs old at that time. She lived til almost 15 yrs old. My Stan passed away in Sept 2015 at almost 15 and a half yrs old from chronic renal failure.	2/27/2016 6:10 PM
69	No	2/27/2016 10:24 AM
70	None	2/27/2016 7:20 AM
71	Louis my dog has just turned 3. He has got pancreatitis . Suffered with it pretty much from adolescence.	2/27/2016 7:16 AM
72	Besides the more obvious disorders I consider these health conditions most challenging in the breed: weak sexual drive and inability to mate in the male low fertility in females nervousness	2/27/2016 7:11 AM
73	No	2/27/2016 6:51 AM
74	None	2/27/2016 5:50 AM
75	Pancreatitis, allergies.	2/27/2016 2:52 AM
76	None	2/26/2016 8:28 PM
77	2 MRId with 1.2/1.5mm CCD, CM2, no symptoms Patella luxation (0/1) Entropion was mild	2/26/2016 8:11 PM
78	None	2/26/2016 7:54 PM
79	No I have not	2/26/2016 7:23 PM
80	Liver, diseased completely, not active, very high ALT levels Same dog also had kidney stones.	2/26/2016 7:22 PM
81	Relatively new to the breed. Bred one litter, all were apparently healthy, no wry mouths, one male in the litter with both testicles descended.	2/26/2016 6:56 PM
82	N/A	2/26/2016 6:51 PM
83	None	2/26/2016 6:09 PM
84	No	2/26/2016 6:08 PM
85	No	2/26/2016 4:48 PM
86	These answers is for many dog during many years	2/26/2016 4:15 PM
87	SM - MRI'd & reported by Rusbridge as a D - non-symptomatic	2/26/2016 2:11 PM
88	I had 1 with lymphoma - 12 yrs old. Not inherited	2/26/2016 11:30 AM
89	no	2/26/2016 9:37 AM
90	none	2/26/2016 9:26 AM
91	Embellical hernia	2/26/2016 9:21 AM
92	Sensitive stomach.	2/26/2016 9:21 AM
93	Allergic conjunctivitis.????	2/26/2016 9:18 AM
94	No	2/26/2016 9:15 AM
95	This is the number from a total of 36 adults and 45 puppies so total of 81	2/26/2016 9:12 AM
96	I growing eye lashes collapsed trachea x2, although these have been on later life	2/26/2016 9:06 AM
97	None	2/26/2016 9:04 AM
98	No	2/26/2016 9:04 AM

99	No	2/26/2016 8:52 AM
100	red rough suddenly became completely paralysed from the waist back and had to be put down at only 7 yrs old. We don't know the cause as it happened when we were out of the house	2/26/2016 8:44 AM
101	Addisons disease	2/26/2016 7:40 AM
102	No	2/26/2016 7:25 AM
103	No- healthy dogs	2/26/2016 7:18 AM
104	None	2/26/2016 7:06 AM
105	My year old pup required surgery to both hind legs for patella Luxation	2/26/2016 4:29 AM
106	My wee 2 year old girl hasn't had any issues apart from eating compost. ..but tablets fixed that	2/26/2016 3:48 AM
107	No other health conditions ever. Re CM/SM: we did not yet MRI our griffons, but until today, they never showed any symptom.	2/25/2016 11:19 PM
108	No	2/25/2016 10:36 PM
109	In general my experience of 30+ yrs in the breed leads me to conclude that generally the breed live happy long lives- over the age of 12yr and up to 16. Some of the conditions ref to are not confirmed as in herited and can be caused by external factors breeding for exaggerations and the normal aging process	2/25/2016 9:55 PM
110	No	2/25/2016 9:39 PM
111	My Griffon, almost one year old now, has a tendency to drag his front paws so that calluses have formed on the tops of his paws.	2/25/2016 9:24 PM
112	umblical hernia	2/25/2016 9:13 PM
113	No	2/25/2016 9:09 PM
114	No	2/25/2016 9:03 PM
115	Hind limb dew claws	2/25/2016 8:47 PM
116	No	2/25/2016 8:44 PM
117	None	2/25/2016 8:44 PM
118	No	2/25/2016 8:39 PM
119	Our griffon has Addison's disease	2/25/2016 8:31 PM
120	NO	2/25/2016 8:24 PM
121	No	2/25/2016 8:23 PM
