

We have two gorgeous Bernese, Moose (2 yrs) and Bear (18 mths), and have been a member of the BMD Club Qld since we have had Moose.

The club has provided us with so much, including great catch-ups for the dogs to socialise, as well as for ourselves finding a lovely little community of warm, welcoming and genuine dog loving people – who understand the good, bad and entertaining parts of having a Bernese in your life! They also have the Facebook page, giving you access to people with a wealth of knowledge and experience with the breed, or just some support that you are not alone when puppies are being crazy 😊 And of course pics of other beautiful Bernese and people who love and appreciate your dog nearly as much as you do!

Sadly we had some health issues with Bear our younger dog which had put us through some tough times, but having the support and shared knowledge of people in the Club saw us with recommendations to vets and specialists who know the breed and has resulted in us finding the best help we could get for him. He is doing great now, and the advice and help of the Club and our Breeder have helped us be able to get on and enjoy our life with him.

We thoroughly value and enjoy our connection with the Club, and we have made some great friends along the way.  
Kelly & Clay
