	INHERITED EYE	DISEASE STATUS	THE RESERVE TO SHARE
This section applies only to those breeds	in which the named conditions are known to	be inherited and which are listed under the Aus	tralian Canine Eye Scheme Schedule 1
congenital (present of birth)		ases database and may be made public but on ON-CONGENITAL (appears later in	
(CEA) Collie Eye Anomaly	[7] [7]	PRA) Generalised Progressive Retinal Alro	E-60 p-60

(RPED) Retinal Pigment Epithelial Dystrophy (MRD) Multifocal Retinal Dysplasia (HC) Hereditary cataract (TRD) Total Refinal Dysplasia (PLL) Primary Lens Luxation (CHC) Congenital Hereditary Cataract The age of onset of non-congenital inherited eye disease varies in different broods and between (PHPV) Persistent Hyperplastic Primary Vitreous individual dogs. It is therefore important to follow any advice given at the time of this examination with regard to the necessity for and frequency of eye examinations as set out in the (PPM) Persistent Pupillary Membrane 'Information for Owners' document available from AVA at www.ava.com.au/aces. "Affected" signifies that there is visible evidence of the inherited disease(s) specified, (G) Goniodysgenesis whereas "Unaffected" signifies that there is no such evidence.

I have examined the above animal (and confirmed its identity) under the Rules of the AVA-ANKC Australian Canine Eye Scheme, with results as shown. Interpretations of eye signs as reported in this form are those of the individual panellist and do not necessarily reflect the opinion of all registered specialists.
