Orivet Full Breed Profile

All in one swab you can get the results for DNA plus:
prcd-PRA, AHRN (FN), EIC and BHFHD plus you can add on additional tests
The colour testing is also done by Orivet and is useful when finding out what colours your dogs carry genes for.

Adult Onset Neuropathy

This test is done in the USA only at this stage, and you need to order your swab and return the swab for testing to the USA. Please remember to list the breed as ENGLISH Cocker Spaniel, otherwise if you just say Cocker Spaniel the results will get skewed with the ACS (American Cocker Spaniel, known only as Cocker Spaniel in the USA).

CHED ([Canine Hip and Elbows Dysplasia Scheme](#))

Hip and Elbow Scoring

Have your animal xrayed at your chosen Veterinarian and send the xray away to a CHED Panellists

The score is then recorded on the ORCHID database
