

The German Shepherd Dog Club of Tasmania Inc.

Championship Specialty Show

Sunday 18th May 2025

Judge: Mr Glenn Gregory (NSW)

Judge's Summation:

The weather was excellent for showing despite some local feeling it was a cold start. This allowed for a most enjoyable day of showing for exhibitors and dogs. The show organisation was excellent commencing with a survey where I was ably supported by Alastair Henderson, followed by breed judging. The atmosphere was relaxed but the event flowed. This was achieved by coordinated work from the Steward and a range of stenographers who pitched in with their own style.

There were several very good quality animals presented with the stand outs being the stock coat open bitch class, where there was quality all the way through. Judging a class of this quality and the challenge it provides is the reason to be a judge. The stock coat open male class contained a quality dog who was a more mature aged exhibit but held his age well as good GSD's should. There are several promising younger exhibits and I look forward to their further development. Exhibits were easy to mouth and were generally very well behaved. The sporting behaviour and support for other exhibitors was most commendable with each exhibit able to show themselves to their best advantage. This meant there was a positive feel to the day and support for all winners. Notably there were some relatively new handlers who are to be commended for their efforts, ability to adjust to brief advice and willingness to assist in the showing of the breed. I certainly look forward to observing their continued development.

Some issues presented were narrowness when moving away, although some hock joints were relatively firm, over angulation of the hindquarter is an obvious and often spoken about issue in the breed with the two issues linked directly. Obvious looseness of elbows due to narrowness of the chest was also noted, often due to slab sidedness. Generally, the movement was balanced and effective viewed from the side, with some being of the highest quality. There were some issues in the length and lay of the upper arm, but the better specimens were very good. The better specimens had well laid croups of very good length with associated broad thighs. Planes of the skull were viewed as an issue as some were not parallel which alters the breed hallmark expression. The temperaments were generally sound and well trained for the dentition check. Clearly work has been done as almost without exception the dogs performed an out and back under control, which assisted the role of judging.

The sportsmanship as mentioned previously was of the highest standard, accepting the comments made in good faith. Although the number of people involved in our sport in Tasmania is small, they are to be commended for their determination to develop the breed in a positive manner by banding together and providing a most positive energy and experience for a visiting judge. Overall, it was a most pleasurable day, and the exhibits left a positive lasting impression with me.
